Good information Ray,

Rick is currently clarifying sampling / response needs with Mark Burkhardt, R8 Lab Director.

Wes,

Not sure which analyses would be needed but for the full suite of metals (ICPAES & MS), Hg

and Cyanide with 48 hour TAT for the Preliminary Results and 7 day TAT for hardcopy package – each sample would cost \$457.

With \$34.5k available we could run 75 samples.

Prices change depending on what is needed and the TATs required. Other Regions may donate their unused Removal allocation upon our request.

Thank you Ray,

How many samples can CLP run with a 48hr TAT for \$35K?

Hi Nick,

That is a question for Wes.

Wes, CLP can provide 48 TAT on inorganic metals analysis. There is about 35k removal money

left on the Region 6 allocation.

Subject: ASB-R6

Ray/Myra,

How are things looking for R6 response to the Gold King Mine release? ASB is looking at CLP inorganic lab capacity and TAT for supporting R8, R6 and R9.

Is this something that might be useful?

Thanks,

Nick
